HC = Headcount

Peirce offers no Accounting associate program, hence the zeros in the AS Accounting HC columns.

It is difficult to interpret trends and the impact of the Covid pandemic across the five years depicted. Students with Transfer Credit comprise most of the Peirce population. The time to BS graduation in months (Total row) appeared relatively consistent for transfer students until the 2023-24 year when we saw increased times to completion for transfer students in both the BS in Accounting and the BS in Business Administration. Conversely, the smaller number of Students without Transfer Credits completed more quickly than usual in 2023-24.

In 2023-24 the overall time to completion was similar for both transfer and no-transfer groups. This data is tracked annually with trends noted and explored.
